AWS S3 Event-Driven Automation Using Lambda

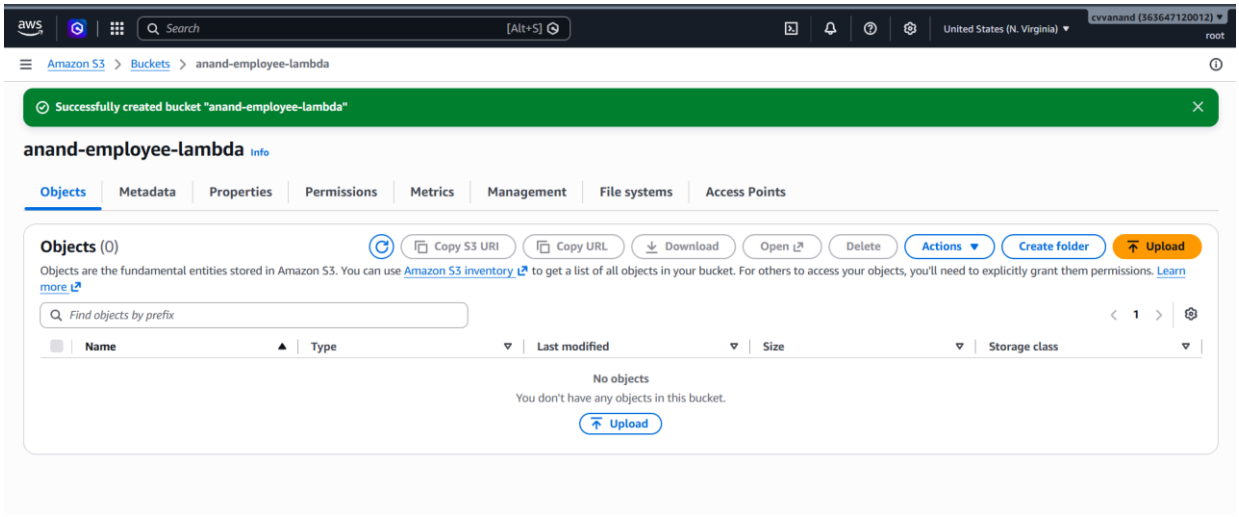

CVV ANAND,

23BTRCL176,

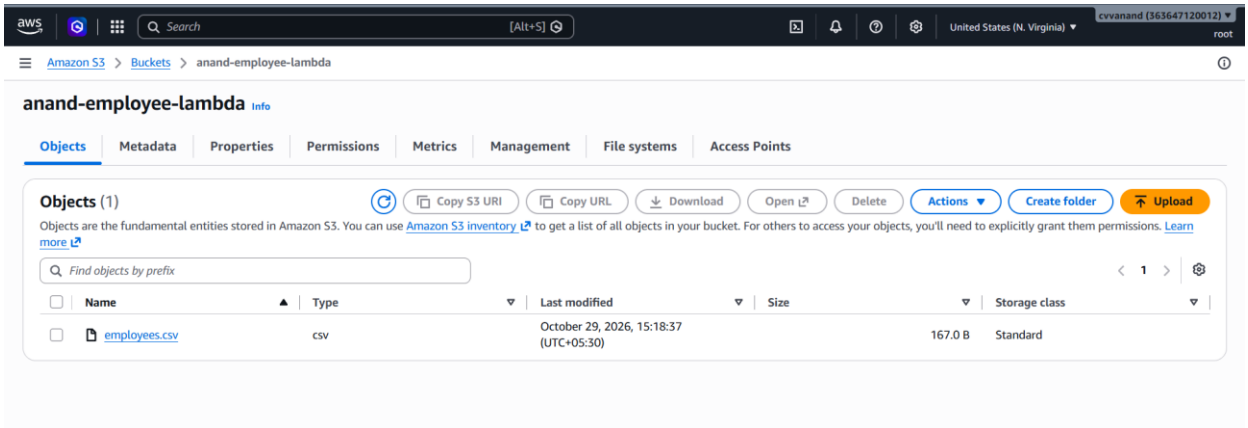

HCLTFP2297504,

AIML-A.

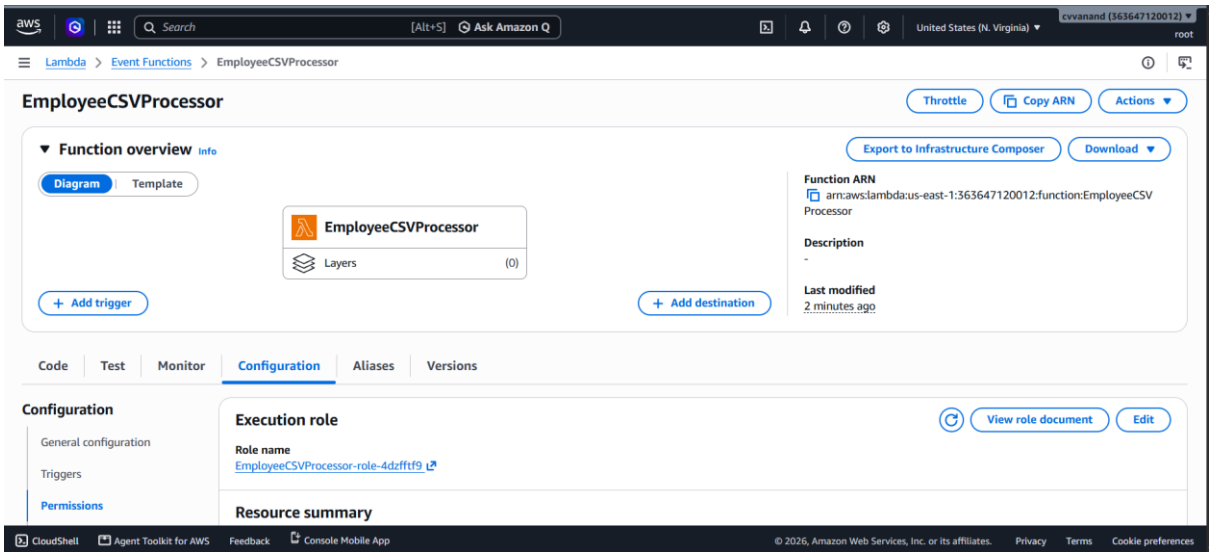

Step 1: Create S3 bucket

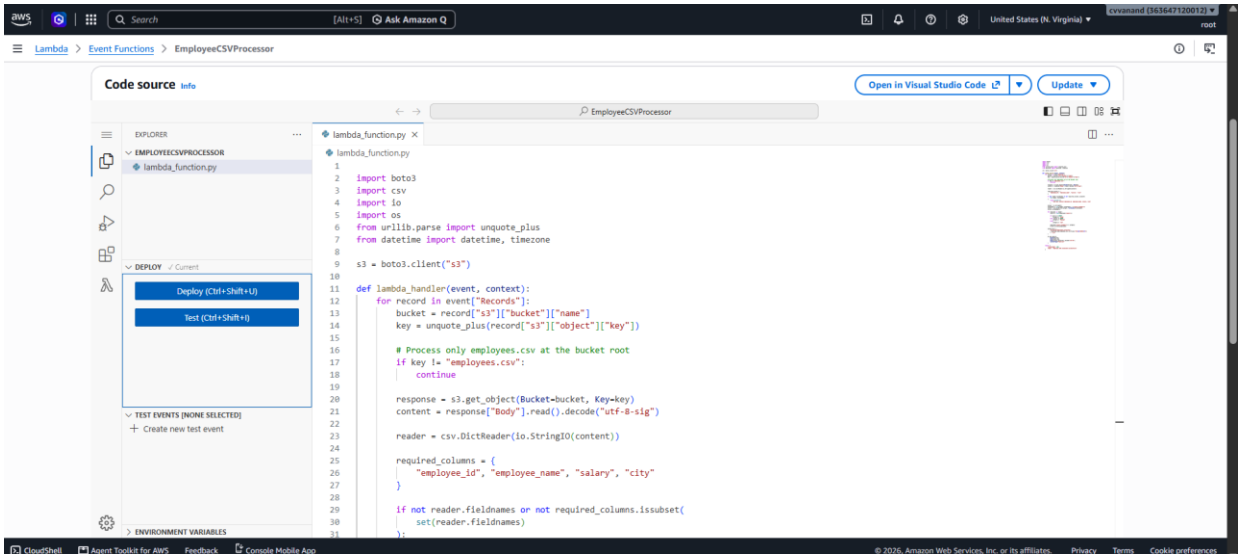

Step 2: Upload csv file

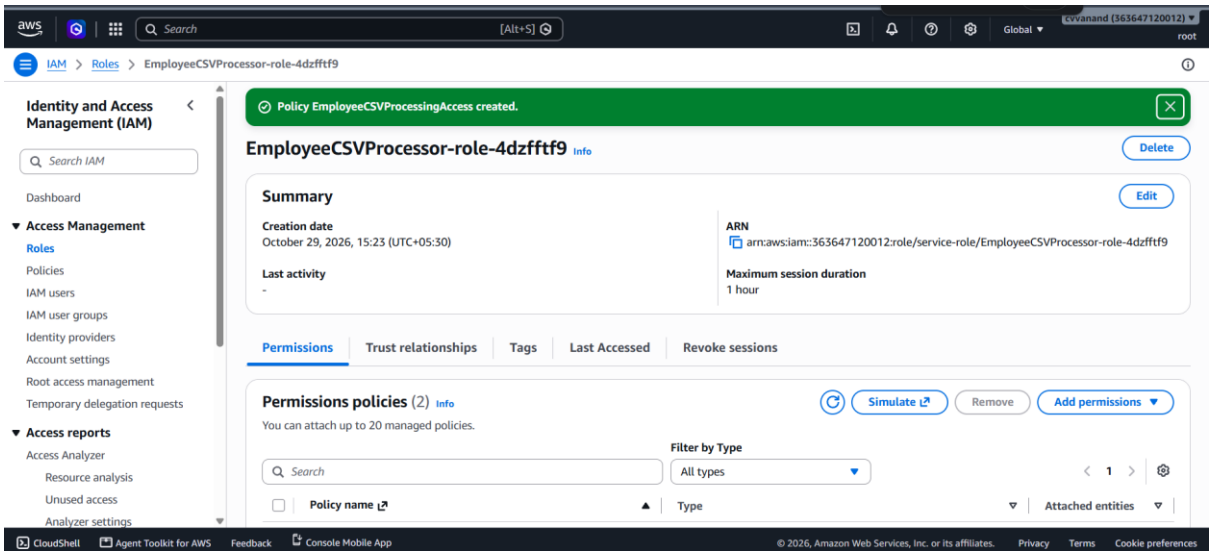

Step 3: Create the Lambda function

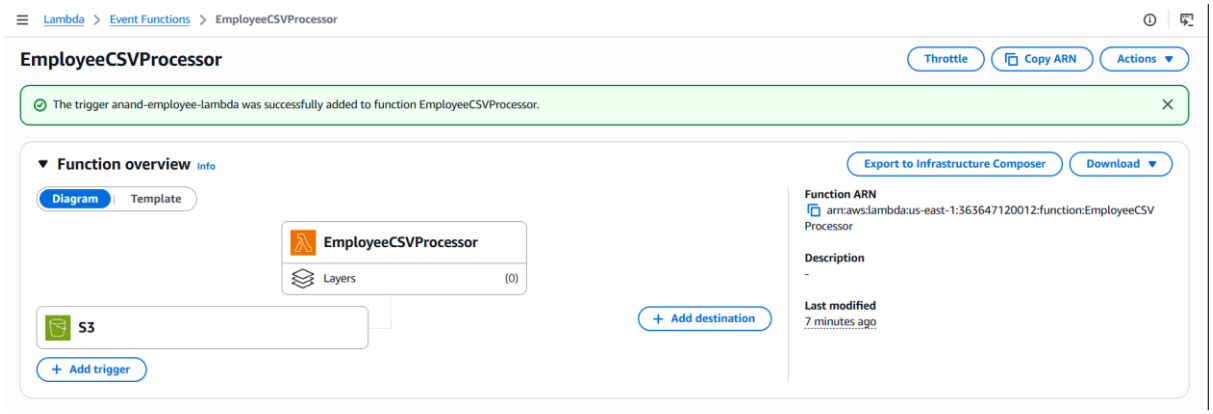

Step 4: Add Python code to your Lambda function

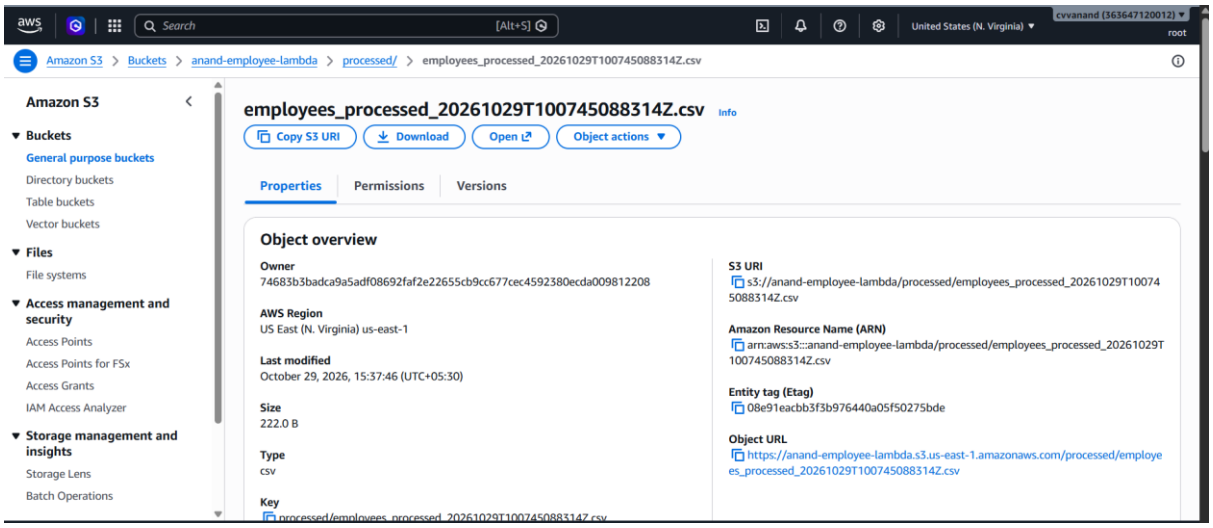

Step 5: Give Lambda permission to access S3

Step 6: Add the S3 trigger

Step 7: Test the automation

We can download to check if all columns are there or not in the csv file.
